

Artificial Intelligence Internship

Internship Details

Name: Sachin Pandey

Roll No.: 2410031664

Course: B.Tech CSE

Batch: 2024-28

University: IILM University, Greater Noida

Organization: Codec Technologies Pvt. Ltd.

Internship: Artificial Intelligence Internship

Duration: 11 June 2026 – 11 July 2026

Mode: Online / Remote

About the Internship

This repository contains the work and documentation completed during my **1-Month Artificial Intelligence Internship** at **Codec Technologies Pvt. Ltd.**

During the internship, I learned the basics of:

- Artificial Intelligence
- Machine Learning
- Python
- NumPy
- Pandas
- Scikit-learn
- Matplotlib
- K-Nearest Neighbors (KNN)

The internship included both theoretical learning and practical implementation of a small Machine Learning project.

Project: Iris Flower Classification

The main project of this internship is **Iris Flower Classification**.

The objective of the project is to predict the species of an Iris flower using four measurements:

- Sepal Length
- Sepal Width
- Petal Length

- Petal Width

The model classifies flowers into three species:

- Iris Setosa
- Iris Versicolor
- Iris Virginica

The **K-Nearest Neighbors (KNN)** algorithm was used for classification.

Technologies Used

- Python 3
- NumPy
- Pandas
- Scikit-learn
- Matplotlib
- Jupyter Notebook / Google Colab

The project uses the Iris dataset available through Scikit-learn.

Project Workflow

```
Dataset
↓
Data Cleaning
↓
Train-Test Split
↓
KNN Model
↓
Model Training
↓
Model Testing
↓
Accuracy
```

The dataset contains **150 flower samples**, with four measurements for each flower. Approximately **80% of the data was used for training** and **20% for testing**.

Internship Learning

Week 1

AI & Python Foundations

- Introduction to AI, ML and DL
- Python basics
- NumPy and Pandas

Week 2

Machine Learning

- Regression
- Classification
- Model evaluation

Week 3

Deep Learning

- Introduction to Deep Learning
- Neural Networks

Week 4

Final Project

- Iris Flower Classification
- KNN Algorithm
- Model testing and evaluation

Repository Contents

```
Artificial-Intelligence-Internship/  
|  
├─ Internship Report.pdf  
├─ Internship PPT.pptx  
└─ README.md
```

Internship Report

Contains the complete documentation of the internship, project description, methodology, technologies used, certificate and references.

Internship PPT

Contains the presentation prepared for the Artificial Intelligence internship.

Expected Outcome

The project demonstrates a simple Machine Learning classification system and provides practical understanding of how a model can be trained and tested using Python and Scikit-learn.

Acknowledgement

I would like to thank **Codec Technologies Pvt. Ltd.**, my university, mentors, teachers, and everyone who supported me during the internship.
